TRAPEZOIDAL PROFILE

PRODUCT SPECIFICATION

Coating	Color Coated Galvanized IS277 /Zinc Aluminum Alloy Coated As1397
Hardness (MPA)	235-550
Guard film-optional (Microns)	30-40

TECHNICAL SPECIFICATION

Covered Width	1020 mm
Supply Width	1080 mm
Pitch	255 ± 2.5 mm
Crest Height	32 ± 2 mm
Crest Width	25 mm

Paint System	Primers:	Epoxy, PU polyester/universal
	Top coat:	Regular Modified Polyester (RMP) /SMP / PVDF / SDP
	Backer coat:	Epoxy, polyester and PU
Characteristics	Primer top coat (micron) Subject to Substrate & Coating Type	7μ (max.)
	Top coat RMP (micron) (coating based)	20 - 25μ (max.)
	Primer + Backer coat (micron)	12 - 15μ (max.)
	Colour	As per RAL code / customer's requirement

Swastik Roofing is equipped with one of the best profiling lines. It is complemented with accessory production machines including CNC Folding & Slitting Machine, Hydraulic Crimping Machine etc.

ADVANTAGES

- Economical Roof Profile with Excellent design flexibility.
- 255 mm pitch for easy water shredding.
- 32mm crest height for higher strength.
- Thickness range form 0.40mm to 0.80mm.
- Available upto 16mtr. in length.

★ MARK OF INGENUITY

- All JSW Colour Coated Galvanised products can be identified by liner marking on lower sides of the sheets. "JSW COLOURON THK. MM JSW STEEL LTD"
- All JSW Colour Coated Galvalume / Al-Zinc products can be identified by liner marking on lower sides of sheets. "JSW COLOURON PLUS THK. MM JSW STEEL LTD"

PLAIN & TRAPEZOIDAL ACCESSORIES

<p>Profiled Ridge (RD 1020)</p>	<p>Plain Ridge (RD 610)</p>
<p>Corner Flashing (CF 405)</p>	<p>Profiled Corner Flashing (CF 610)</p>
<p>Profiled Gable Flashing (PGF 610)</p>	<p>Box Gutter (BG 610)</p>
<p>Profiled Box Gutter (PBG 610)</p>	<p>Eave Gutter (EG 815)</p>
<p>Profiled Eave Gutter (PEG 815)</p>	<p>Valley Gutter (VG 815)</p>
<p>Deep Trims (DT 305)</p>	<p>Down Take Pipe (DTP 405)</p>

CRIMPING

We at Swastik Roofing is capable to produce the required Crimping.

The crimped sheets are essential used for curved roofs as this crimped sheets are manufactured from normal trapezoidal profile sheet with required bending as per structure requirement.

This crimped sheets ensure joint less long bend sheets thus no chance of leakage from the bend portion.

- Different types of Crimped profiled sheets were used -
 - Profile Ridge - Roof Cover
 - Profile Canopy - Gate Cover
 - Profile NLC - Shade cover from Roof to Cladding
 - Profile Curvature - Overlapping.

JSW | explore
Infinite Possibilities

★ AUTHORISED STEEL SERVICE CENTRE ★

Over the years, JSW Shoppes have been offering value-addition to quality conscious consumer through their processing facilities, which is an ideal platform for JSW to brand the Service Centre eco-system, thus emerged 'JSW explore'.

Its chief purpose would be to efficiently cater the steel needs of the last mile end consumer through the robust network of branded steel service centre nurturing innovation & growth. An umbrella brand platform spanning steel value addition across product categories viz, HR, CR, Colour Coated, TMT etc.

WIND DRIVEN ROOF VENTILATOR

The concept of Ventilator is to create a regular flow of stale/contaminated air from inside the working area towards atmosphere. It supply fresh air which is essential for the workers to regenerate the energy level & provide cooling effect in the environment

Main Advantages

Low power consumption.

Operational cost is NIL.

Improved Efficiency of workers.

WALL LOUVERS

Wall Louvers are designed and applied in custom lengths ready for quick installation:

- The Special Design Allows Free Flow of air, restricting entry of water & dust.
- The Louvers are made using Zinc Coated, Zincolume & Colour Coated Galvanized Steel.
- Available in Various Colors.
- Light weight, Ready to install.
- Long Life & Corrosion Free
- Maintenance Free
